STATEWIDE CURRENT SITUATION: Scattered showers and storms are possible over North-Central Texas today. Scattered showers and thunderstorms will slide into central Texas tonight through Sunday. By Monday, we are expecting to see increasing moisture near the coast that would lead to showers and a few storms. This activity looks to be a little more widespread near the coast on Tuesday. Also on Tuesday, a front will be moving into northern portions of the state, bringing organized showers and storms with it by early Wednesday morning. This front looks to quickly move through the state, however, and offshore on Thursday.

With this forecast, Texas then remains dry Thursday through Saturday of next week.

In the wake of this TS Harvey, southeast Texas rivers continue to experience major flooding on the lower Guadalupe River along the gulf coast to the Sabine River.

Governor Abbott has issued a proclamation condemning the practice of price gouging, and reminded Texans that such practices are illegal and will be investigated and punished.

Governor Abbott has issued a suspension of specific vehicle titling and registration requirements for the next 45 days in the 58 counties specified in the state's disaster declaration. As a consequence, vehicle titling and registration expirations are suspended in order to relieve that burden upon Texans. Law enforcement will not issue citations for expired registration in all affected counties until October 16, 2017.

Governor Abbott has issued a proclamation to allow the Port Aransas Independent School District Board of Trustees to conduct a telephone meeting within a reasonable distance of the district.

Governor Abbott issued a disaster declaration for the counties of: Angelina, Atascosa, Aransas, Austin, Bastrop, Bee, Bexar, Brazos, Burleson, Caldwell, Cameron, Calhoun, Chambers, Colorado, Comal, Brazoria, DeWitt, Fayette, Fort Bend, Galveston, Goliad, Gonzalez, Grimes, Guadalupe, Hardin, Harris, Jackson, Jasper, Jefferson, Jim Wells, Karnes, Kerr, Kleberg, Lavaca, Lee, Leon, Liberty, Live Oak, Madison, Matagorda, Montgomery, Newton, Nueces, Orange, Refugio, San Patricio, Polk, Sabine, San Jacinto, Tyler, Trinity, Victoria, Walker, Waller, Washington, Wharton, Willacy and Wilson.

Governor Abbott requested and was approved for a Presidential Disaster Declaration for the following counties: Aransas, Bee, Brazoria, Calhoun, Chambers, Colorado, Fayette, Fort Bend, Galveston, Goliad, Hardin, Harris, Jackson, Jasper, Jefferson, Kleberg, Liberty, Matagorda, Montgomery, Newton, Nueces, Orange, Sabine, San Jacinto, San Patricio, Refugio, Victoria, Waller, and Wharton counties for Individual Assistance and assistance with debris removal and emergency protective measures (Categories A and B), including direct federal assistance, under the Public Assistance program.

Bexar, Dallas, Tarrant and Travis counties are eligible for emergency protective measures (Category B), including direct federal assistance, under the Public Assistance program.

Significant River Flood Outlook

Valid: 9/1/2017 - 9/6/2017

West Gulf River Forecast Center 9/1/2017 11:28:32 AM

**SIGNIFICANT RIVER
FLOODING POSSIBLE.**

**SIGNIFICANT RIVER
FLOODING LIKELY.**

**SIGNIFICANT RIVER
FLOODING OCCURRING
OR IS IMMINENT.**

Significant River Flooding Impacts include:
Roads adversely affected. Residential,
commercial, industrial, and/or agricultural
areas affected. May require evacuation of people.

NOTE: Flash Flooding or Minor River Flooding
will NOT be included in this outlook.

Neches Basin – Record Flooding – Rain has ended but river continues to move flood downstream. BA Steinhagen is gradually reducing releases. Major flood on Pine Island and other Bayous and the record flood from Village Creek at Kountze will also route downstream to Beaumont. Beaumont could potentially reach 20 feet plus before being able to start to drain its water into Sabine Lake, which may have backed up well into Beaumont.

Brazos Basin – Record Flooding – No significant precipitation was received in the past 24 hours ending at 7 AM Friday morning.

The largest impacts (Major Flood Stage) will be occurring at the lower end of : the Brazos River at Richmond (RMOT2), Brazos River at Rosharon (ROST2), and Brazos River at West Columbia (WCBT2).

Current forecasts are based on 12 hours of future rainfall (QPF), however the next 12 hours show no rainfall. Future QPF beyond 12 hours will have no impact on current crest forecasts, as Harvey has moved out of the area. River forecast confidence will increase in as upstream crests arrive and Harvey moves out of the area. The focus will shift to timing the recession below critical impact elevations.

For the Brazos at Richmond (RMOT2) have observed the crest early Friday morning and the river will continue a broad crest then start a recession.

For the Brazos at West Columbia (WCBT2), the forecast trend continue to hold as a rising pattern to 32 ft. There is more uncertainty with this forecast, as compared to the RMOT2 forecast, because: (1) there is no measured rating curve (2) short duration of record (3) inter-basin transfer to Oyster Creek and potentially San Bernard basins.

The GOES-16 satellite Veggie band CH03 indicated that inter-basin transfer to Oyster Creek may have been occurring above West Columbia on August 30, although it is unclear if flow is being lost or gained from Oyster Creek. Also note, the timing from the 2016 crest last year was used to adjust the timing of the forecast 32 foot crest.

Sabine Basin – Record Flooding – Rainfall associated with Harvey has caused major to near record flooding on the lower Sabine River system from Bon Wier downstream through Deweyville (DWYT2) and Orange (ORNT2) including Bayou Anacoco near Rosepine (RPIL1). Water should remain high for a few days.

San Jacinto Basin – Major Flooding – All of the basins across the San Jacinto system, including the larger creeks and bayous, have crested. Some basins are still experiencing major flooding. Lake Conroe is reducing releases. Lake Houston releases will continue. Addicks and Barker Reservoirs are making releases as well, with Buffalo Bayou remaining in flood stage/above criteria until further notice.

San Bernard Basin – Major Flooding – Heavy rainfall has caused major to record flooding across the entire San Bernard River basin. Flooding will continue into the weekend.

Trinity Basin – Major Flooding – Lake Livingston releases have been on a steady decrease for several days and local runoff is finally tapering off, so all tributaries have crested and the Trinity River has crested and begun falling at all locations downstream to Moss Bluff (MBFT2) where it is near crest. Flooding continues in the major category from Liberty (LBYT2) downstream.

Guadalupe Basin – Major Flooding – On the Guadalupe River, Victoria (VICT2) and Bloomington (DUPT2) have crested. The river will slowly recede over the next several days. Future rainfall will not significantly impact flows over the next 5 days.

Colorado Basin – Major Flooding – The Colorado River has crested at Wharton (WHAT2) and is now starting to fall. The river will remain in major flood levels for the next couple days. Downstream, slight rises are possible at Bay City and Matagorda.

OPERATIONAL PRIORITIES:

1. Protect life and property.
2. Support rapid & effective response.
3. Collect and disseminate accurate incident information to improve decision-making.
4. Accurately track incident costs associated with assigned resources for cost recovery.
